## Oral Hygiene

**By third grade 69% of the children have a history of tooth decay.**

**At any given moment one-third of the children have untreated tooth decay.**

**Roughly 8% of kindergarten and 9% of third graders are sitting in a classroom with a toothache or dental infection.**

**The problem is worse for children who come from low-income families.**

Alameda County Public Health Department, Office of Dental Health, conducted an oral health assessment of Alameda County school children in kindergarten and third grades during the 2002-03 and 2003-04 school years. The 3,269 children screened came from a representative sample of 22 public schools.

## Children's Obesity and Fitness

- 2% of school-age children meet minimum numbers of servings for Food Guide Pyramid.
- Over 40% of an average family's food budget is spent on fast food.
- Only 25% of students are enrolled in daily physical activity.
- Rising obesity will cost U.S. health care \$344 billion a year by 2018 (USA Today 11/17/2009).
